

Entra Authentication Posture - Executive Summary

Synthetic example - no customer tenant data. This document demonstrates the optional PDF deliverable.

Observation window: 23 Jul 2026 20:41 UTC through 24 Jul 2026 20:41 UTC

Total users	Phishing-resistant	Strong MFA	Explicit-method evidence
23	2	4	5 of 14 sign-ins (35.7%)

Registration posture

Strength tier	Registered users	Explicitly observed users
Phishing-resistant MFA	2	0
Passwordless MFA	0	0
Strong MFA (app, token, or TAP)	4	1
Phone-based MFA	0	0
Single-factor / SSPR only	0	0
None / unclassified	17	0

How to interpret this example

Registration posture and explicit sign-in evidence are intentionally reported separately. A sign-in whose details say that a requirement was previously satisfied does not identify a fresh authentication method. Consequently, missing explicit-method evidence must not be interpreted as MFA non-use.

In a real engagement, restrict access to the evidence CSV and Evidence - Restricted workbook worksheet because they contain authentication telemetry.
